

# Project summary

## Tōtara Haumaru, North Shore Hospital

New Zealand

Te Whatu Ora - Health New Zealand is currently undertaking major capital works at its North Shore Hospital campus in order to accommodate projected population growth in Auckland's northern region. The cornerstone of this programme is a new four-storey hospital building, Tōtara Haumaru, located adjacent to the existing Elective Surgery Centre and linking to existing hospital facilities via a sky bridge.

The facility will provide an Operating Unit consisting of eight theatres and an Endoscopy Unit with four procedure rooms and five 30-bed inpatient wards totalling 150 beds. The project also anticipates a healing garden within an interior courtyard that will support wellbeing and offer a place of respite for patients, visitors and staff.

### Supplied by **modempak**

- Alphamax Recessed Services Panels
- Max50 Surface Mounted Services Panels
- MediTek Switchgear & Accessories
